

Cutter & Buck Organic Cotton

We hereby confirm that the products in the Cutter & Buck product ranges Manzanita (352404/352405/352408/352409) and Hedley (352412/352413) are made of Organic Cotton and meet requirements of organically grown cotton fibers on basis of recognized international standards (IFOAM family of standards, EEC 834/2007, USDA NOP). For products with polyester blended material (with minimum 70% certified organic fibers), the polyester origins from recycled post-consumer PET bottles.

The products also meet high ecological and social criteria throughout the whole supply chain. These requirements include, among others, that all chemical inputs must be evaluated and meet requirements on stringent limit values for unwanted residues. Further, social criteria are based on the key norms of the International Labour Organisation (ILO), including requirements such as minimum wage, working hours and prohibition of child labor. Suppliers throughout the whole supply chain are inspected and evaluated on these requirements through third-party audits.

Upon request, further supporting documentation can be provided.

On behalf of New Wave Mode AB
