# Counters

Counters perform different functions. They may be used as a desk, point of customer service or as a tasting counter. They will be useful as an addition to exhibition stands, but also will work well as free-standing combinations for presenting a brand, service or product. Straightforward structure provides fast assembly with no tools required.

# ARIETE

Counters in Smooth Display system are characterized with graphics printed on elastic textile stretched on aluminium structure. Textile is affixed to the top by means of silicone rubber. Aluminium structure provides stability while maintaining small weight.

- Structure made of 32 mm diameter aluminium pipes.
- Textile graphics on elastic material.
- Table top made of black furniture plate.
- Maximum load of 50 kg.
- Transport bag.
